

BUSINESS PROPOSAL

For Unical MicroFinance Bank (THE HOW-IT-WORKS)

We are excited to present My-Uni-Pay, a digital payment solution designed to simplify and modernize the way students make school-related payments at the University of Calabar. This proposal outlines a practical approach to making these payments faster, more convenient, secure, and accessible from the comfort of students' devices.

31st August 2026

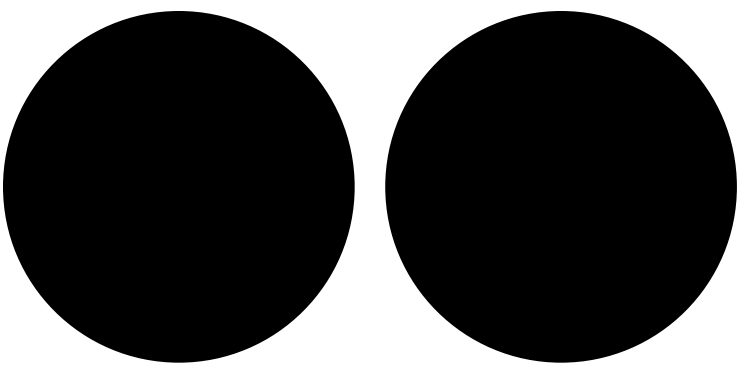

A Direct Payment

- 1.1 Payment Selection
- 1.2 Direct Transfer
- 1.3 Manual Bank Verification
- 1.4 Digital Receipt

FLOW

A

01

Payment Category Setup

The bank creates and manages the available payment categories on My-Uni-Pay. Each category contains the relevant payment details, including the account name, account number, amount, and payment description.

02

Select Payment

The student browses the available payment categories and selects the payment they wish to make. The app displays all relevant payment information before the student proceeds.

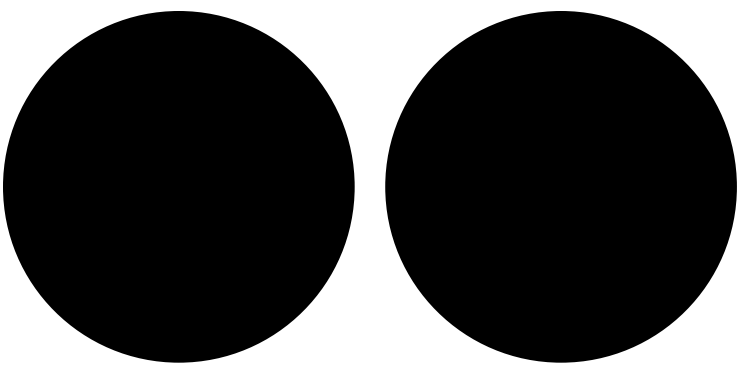

03

Make Transfer

The student makes a bank transfer from their preferred banking platform using the payment details provided by My-Uni-Pay. The student then submits the transaction reference through the app.

FLOW

A

04

Bank Verification

The bank receives the payment request through its dashboard and reviews the submitted transaction details. The transaction is cross-checked against the bank's transaction records to confirm that the payment was successfully received.

05

Payment Approval

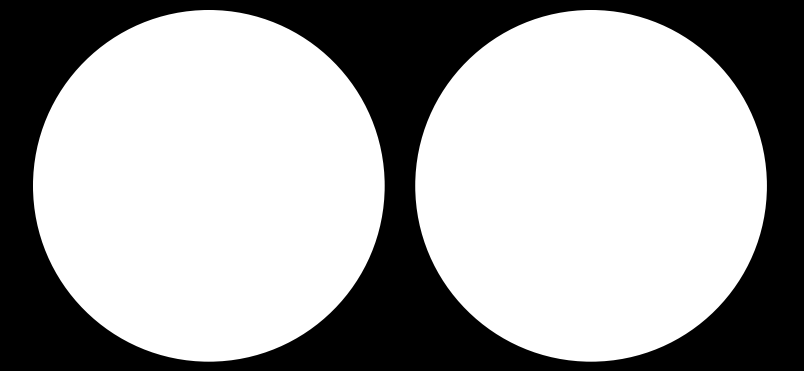

Once the transaction has been verified, the bank approves the payment through the dashboard. The approval updates the student's payment status on My-Uni-Pay.

06

Digital Receipt

Following approval, My-Uni-Pay automatically generates a digital receipt for the student. The receipt serves as proof of payment and can be accessed whenever needed.

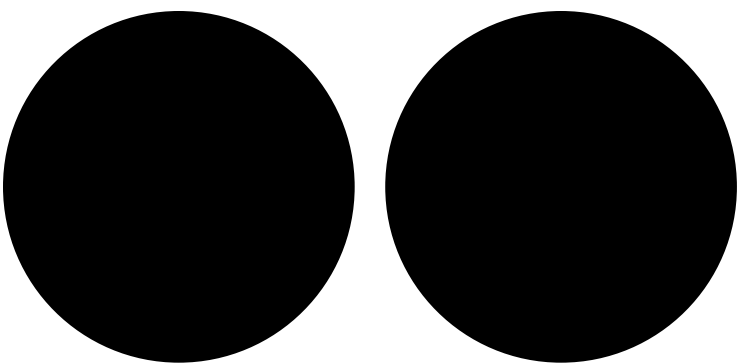

B Centralized Payment Vault

- 1.1 Payment Selection
- 1.2 Vault Transfer
- 1.3 Automated Verification
- 1.4 Digital Receipt

FLOW

B

01

Payment Category Setup

The bank creates and manages the available payment categories on My-Uni-Pay. Each category is linked to the appropriate payment account and contains the relevant payment information required by the student.

02

Select Payment

The student selects the school-related payment they wish to make. My-Uni-Pay displays the payment details and amount before the student proceeds.

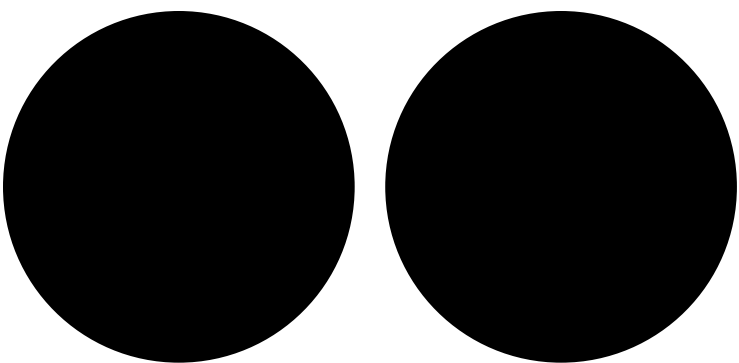

03

Make Transfer

The student transfers the required amount to the designated payment account provided by the integrated payment provider. The payment provider receives and processes the transaction on behalf of My-Uni-Pay.

FLOW

B

04

Automated Verification

Once the payment is received, the payment provider sends a webhook notification to My-Uni-Pay. The system automatically verifies the transaction and updates the student's payment status without requiring manual bank verification.

05

Payment Confirmation

After successful verification, My-Uni-Pay confirms the payment and records the transaction. The corresponding funds remain within the centralized payment vault until they are reconciled and settled to the appropriate bank accounts.

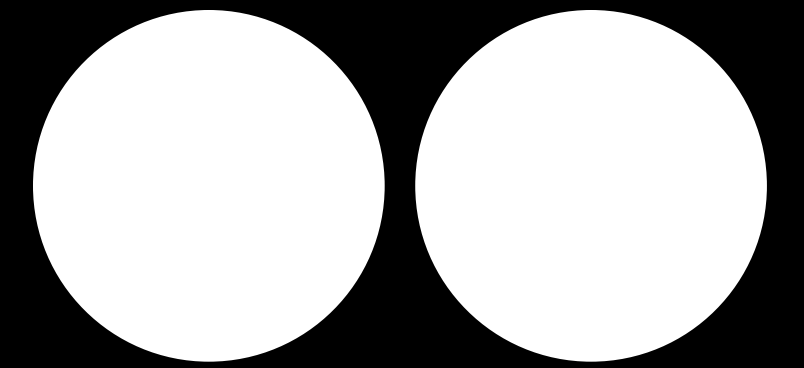

06

Digital Receipt

My-Uni-Pay automatically generates a digital receipt once the payment has been confirmed. The student can access the receipt within the app as proof of payment and for future reference.

C

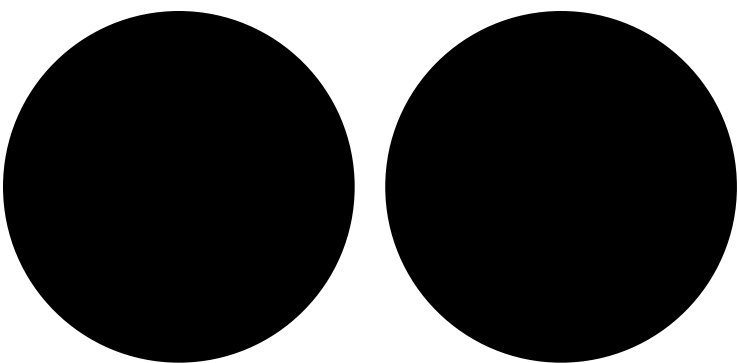

Direct Bank Integration

- 1.1 Payment Selection
- 1.2 Bank Transfer
- 1.3 Automated Verification
- 1.4 Digital Receipt

FLOW

C

01

Payment Category Setup

UNICAL Microfinance Bank creates and manages the available payment categories on My-Uni-Pay. Each category is configured with the appropriate account details, payment amount, and other relevant information.

02

Select Payment

The student selects the school-related payment they wish to make. My-Uni-Pay displays the relevant payment details and amount before the student proceeds.

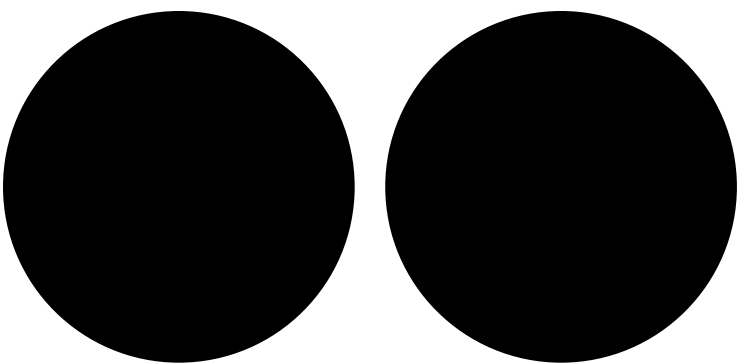

03

Make Transfer

The student makes the payment using their preferred bank or an available payment channel supported by the bank's digital infrastructure. The transaction is processed through the bank's existing digital payment system.

FLOW

C

04

Automated Verification

Once the payment is received, UNICAL Microfinance Bank's digital infrastructure sends a webhook or transaction confirmation to My- Uni-Pay. The system automatically verifies the payment without requiring manual intervention.

05

Payment Confirmation

Following successful verification, My- Uni-Pay updates the student's payment status and records the transaction. The bank retains full visibility of the transaction for reconciliation and administrative purposes.

06

Digital Receipt

My- Uni-Pay automatically generates a digital receipt once the payment has been confirmed. The student can access and retain the receipt as official evidence of the completed payment.
