IDENTIFYING THE BOTTLENECK

UNICAL students make a large volume of school-related payments through UNICAL Microfinance Bank. However, the process remains largely physical and manual.

Students often have to deal with long queues, physical visits, and manual payment verification — even when the actual payment can already be made digitally from their preferred bank. With tens of thousands of students, this creates unnecessary pressure on both students and the Bank.

SAME IDEA - FROM A MOBILE PHONE

The Bank Remains the administrative control. They VERIFY and issue RECEIPTS to all students. Difference is, this time, it's done DIGITALLY

NEXT STEPS

The initial platform can be demonstrated in 10 days time.

We would welcome the opportunity to schedule a short meeting with UNICAL Microfinance Bank to demonstrate the platform and discuss a potential pilot.
